

**Cover Letter:**

I am a first-year Front-End Development student with a strong interest in building clean, accessible, and user-friendly websites. Through my studies, I have worked with HTML, CSS, and JavaScript, and I enjoy turning designs into functional web pages.

I have experience using tools such as Figma, Gantt charts, and GitHub. On my GitHub profile, you can find all my projects from my first year as a Front-End Development student.

I am motivated to continue learning and improving my skills, and I am especially interested in front-end development and modern web technologies.

Kind Regards,

Lloyd Bjelland
